Agreement Among Pairs of Justices

The following tables show the percentage of decisions in which every possible pair of justices found themselves on the same side—either both in the majority or both dissenting. The first table covers all 133 decisions; the second table narrows its focus to decisions that were not unanimous. When reading the first table, for instance, one finds that Justices Abrahamson and Day voted together in 80% of the decisions, while the figure for Justices Heffernan and Beilfuss was 96%.
